Complaint Window and Seller Settlement – Flow Charts

For the full stack developer. Swim lanes show who does what. Scroll sideways on a small screen.

1. Complaint window – who does what

24 hours to raise. 7 days to close. Only Admin closes. Every step goes to the audit log and to the customer.

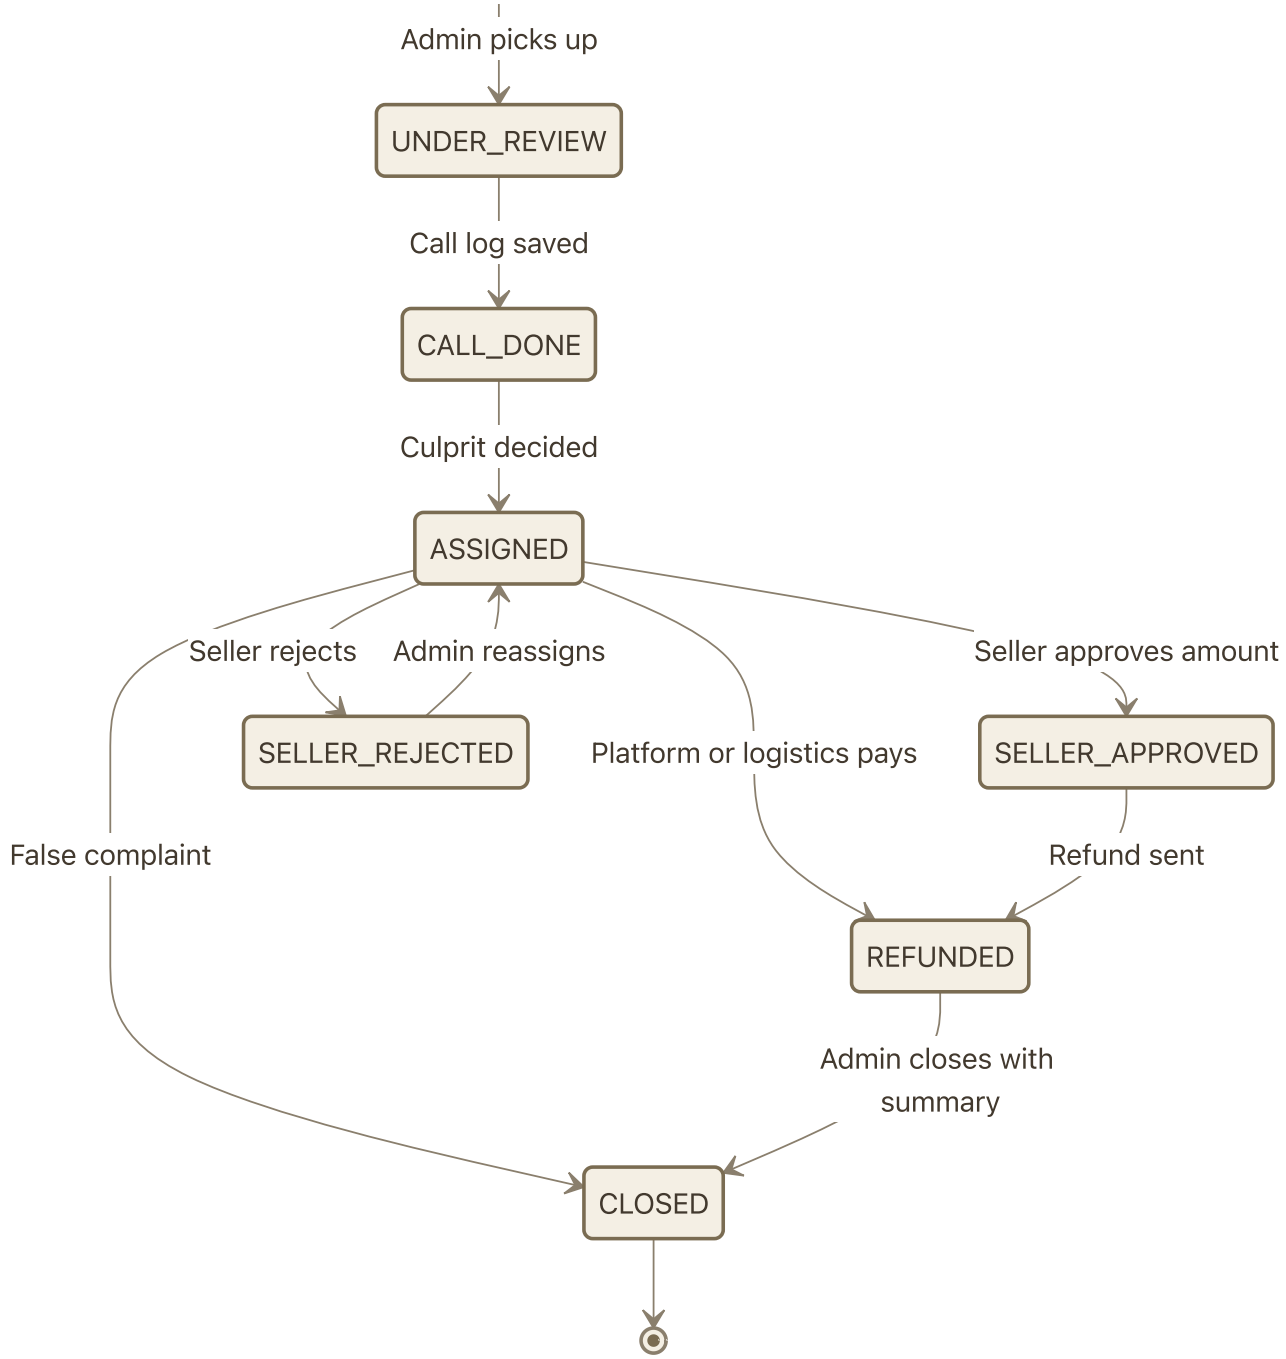

Solid arrow = action. Dotted arrow = automatic system event. The seller can reject and Admin can reassign any number of times.

2. Complaint ticket – status machine

Status changes only through these transitions. Each one writes an audit entry and sends a customer message.

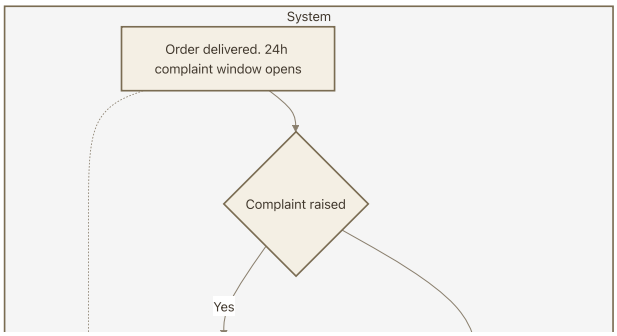

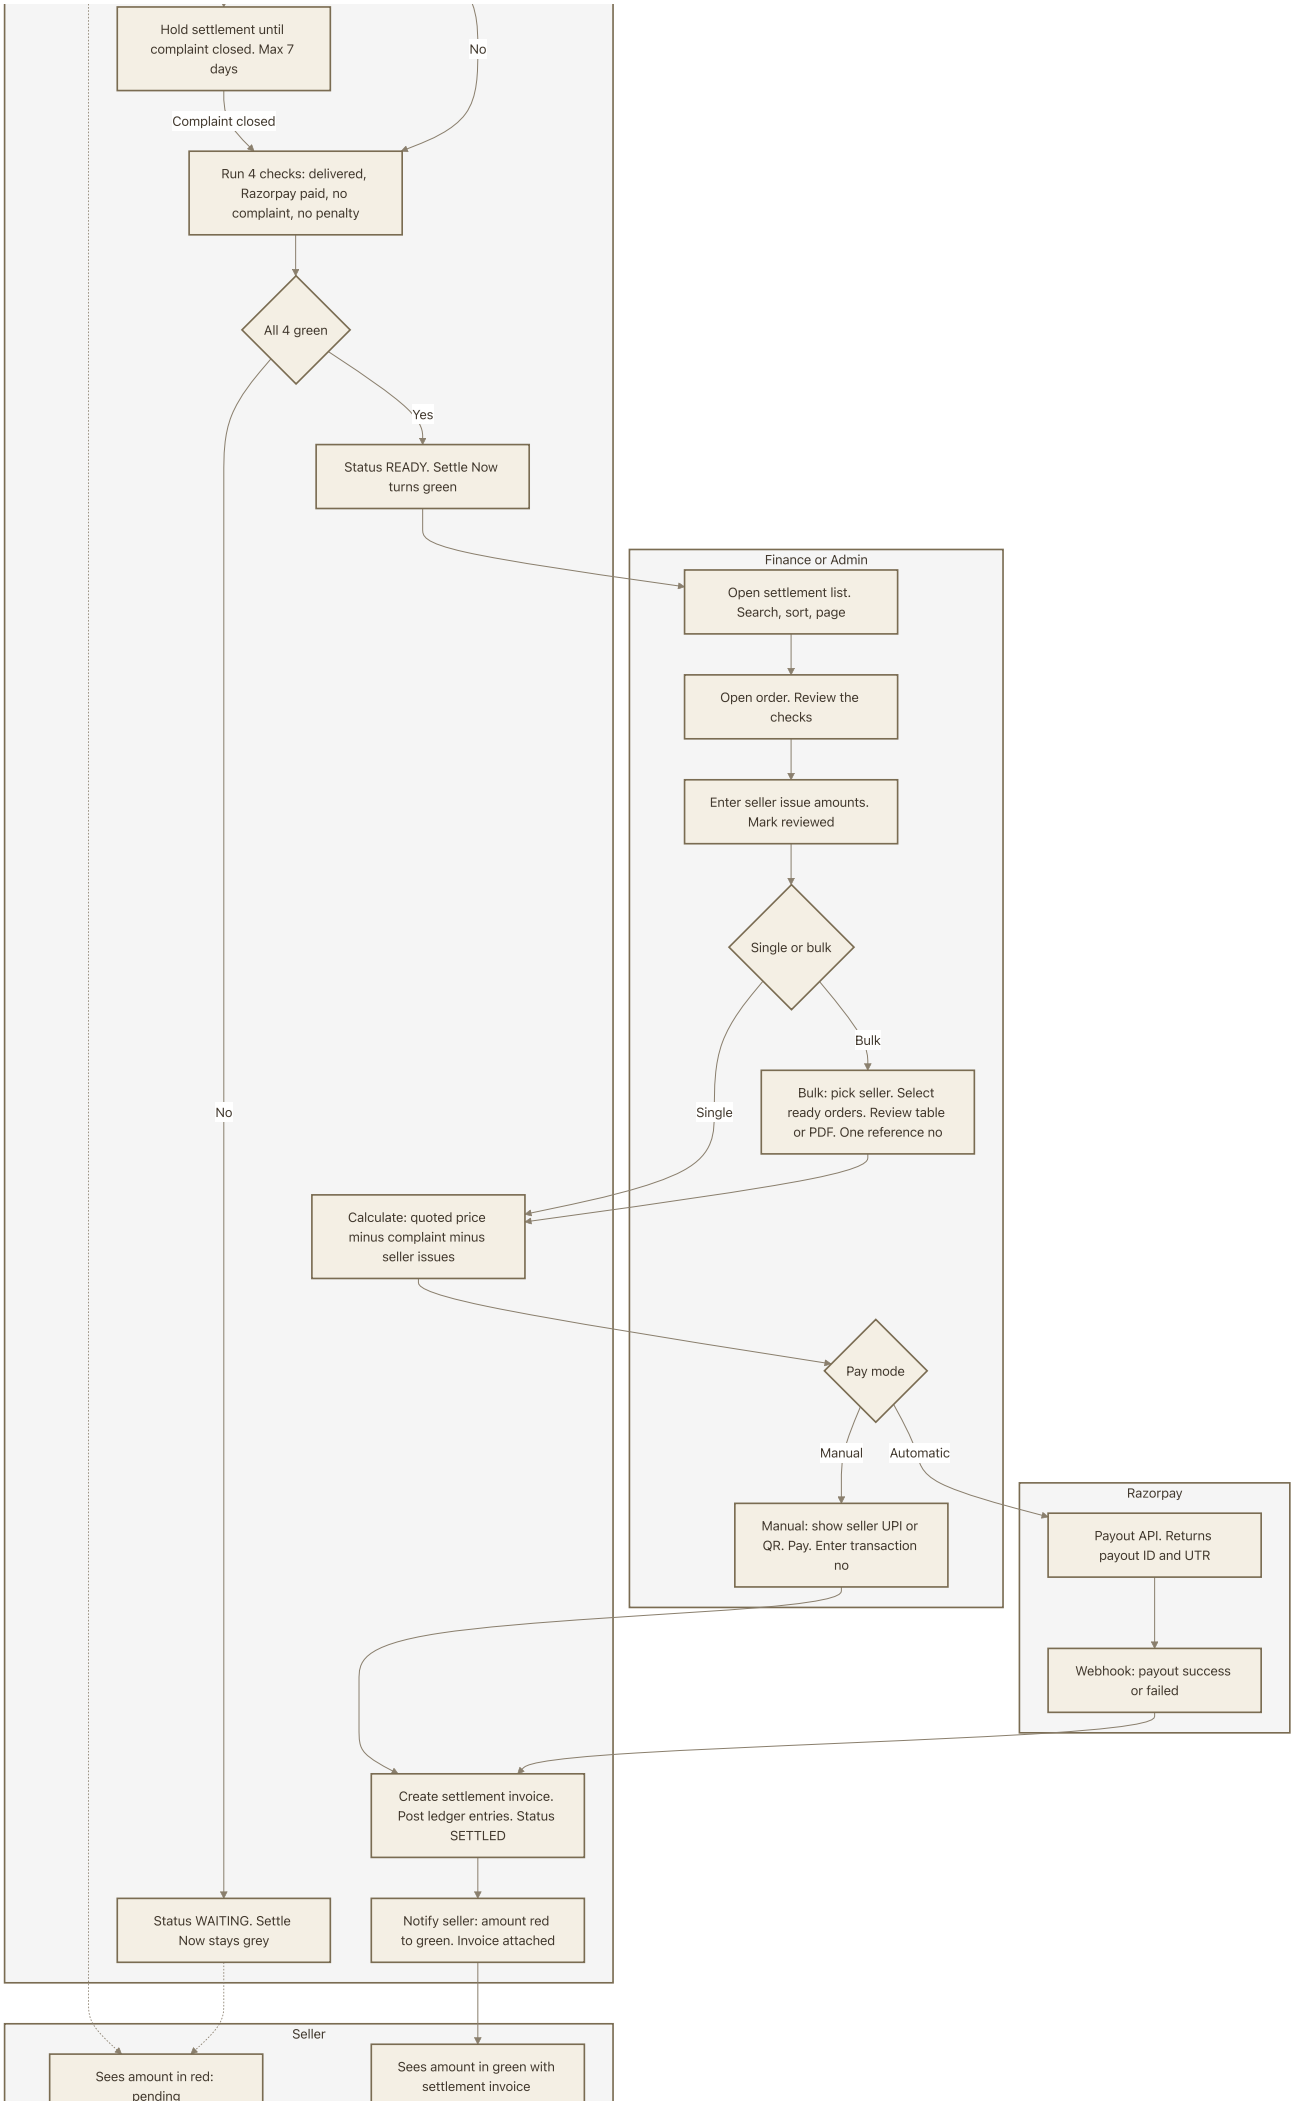

OVERDUE is a flag on any open ticket after day 7, not a separate status.

3. Seller settlement – single and bulk

Settlement amount = quoted price minus complaint deduction minus seller issues. Pay manually or through Razorpay.

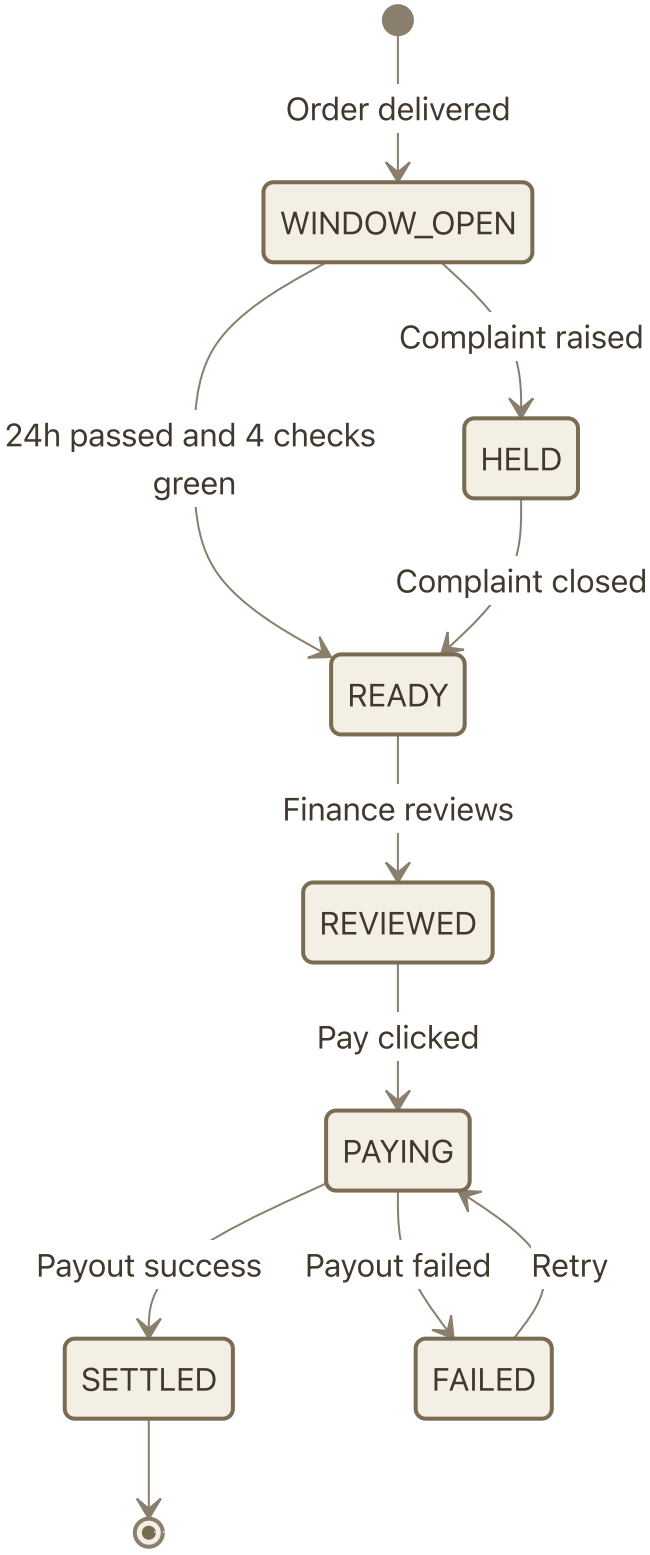

Hold settlement until complaint closed. Max 7 days
No
Complaint closed
Run 4 checks: delivered, Razorpay paid, no complaint, no penalty
All 4 green
Yes
Status READY. Settle Now turns green
No
Finance or Admin
Open settlement list. Search, sort, page
Open order. Review the checks
Enter seller issue amounts. Mark reviewed
Single or bulk
Bulk
Single
Bulk: pick seller. Select ready orders. Review table or PDF. One reference no
Calculate: quoted price minus complaint minus seller issues
Pay mode
Manual
Automatic
Manual: show seller UPI or QR. Pay. Enter transaction no
Razorpay
Payout API. Returns payout ID and UTR
Webhook: payout success or failed
Create settlement invoice. Post ledger entries. Status SETTLED
Status WAITING. Settle Now stays grey
Notify seller: amount red to green. Invoice attached
Seller
Sees amount in red: pending
Sees amount in green with settlement invoice

Bulk settlement uses the same flow for every selected order. All orders and invoices in one bulk settlement share the same reference number and say "Bulk settlement".

5. Developer notes

Rules and formulas

Complaint window	`delivered_at + 24h` . After that, no feedback or complaint can be created.
Ticket SLA	`due_at = opened_at + 7 days` . Alert on day 5, flag OVERDUE after day 7.
Ready to settle	delivered AND Razorpay paid AND window closed AND complaint none or closed AND no pending penalty.
Settled amount	`quoted_price − complaint − packing − extra − quality − price_mismatch − misc`
Example order	Customer pays 235 = item 100 + GST 5 + commission 30 + delivery 100. Rider cost 99. Seller gets 100.
Who pays a complaint	Seller: deduct at settlement. Platform: from commission. Logistics: platform pays, recovery ticket.
Closing	Only Admin, with at least one culprit and a final summary.
Audit	Append-only. Never update or delete. Corrections are new rows.

Main tables

`complaints`	id, order_id, status, culprit, amount, opened_at, due_at, closed_at, closed_by, summary
`complaint_items`	complaint_id, order_item_id, reason, photos
`complaint_events`	complaint_id, actor, role, from_status, to_status, note, created_at, device
`call_logs`	complaint_id, party, outcome, notes, duration, by
`settlements`	id, order_id, seller_id, quoted_amount, deductions, settled_amount, status, reviewed_by, mode, txn_no, bulk_id, invoice_no, paid_at
`bulk_settlements`	id, ref_no, seller_id, order_count, total, created_by
`notifications`	user_id, type, payload, read_at

API sketch

AREA	ENDPOINT	WHO
Complaint	`POST /orders/{id}/complaints` (feedback or complaint)	Customer
Complaint	`POST /complaints/{id}/calls` , `/assign` , `/refund` , `/close`	Admin
Complaint	`POST /complaints/{id}/seller-decision`	Seller
Settlement	`GET /settlements?q=&sort=&page=` (wildcard on order, item, customer, phone)	Finance / Admin
Settlement	`PATCH /settlements/{id}/issues` , `POST`	Finance /

	`/settlements/{id}/review` , `POST /settlements/{id}/pay`	Admin
Bulk	`POST /bulk-settlements/preview` , `POST /bulk-settlements/{id}/pay`	Finance / Admin
Razorpay	`POST /webhooks/razorpay/payout` (success or failed)	System

Background jobs

Every minute	Close expired 24h windows. Mark orders READY when checks turn green.
Daily	Day 5 complaint alert. Day 7 OVERDUE flag.
On payout failure	Set FAILED, notify Finance, allow retry.

Access

Commission, platform fee and profit appear only to Admin and Finance. The seller sees items, prices, deductions, the settled amount and the settlement invoice. The customer phone and address stay masked.
