PARTIAL ORDER TRANSACTION MANAGEMENT SYSTEM

Executive Summary

A flexible order management module that allows Sellers, Customers, Assistants, and the Platform to handle partial product availability without cancelling the entire order. The system supports partial cancellation, product replacement, split delivery, order modification, price adjustments, refunds, and automated settlement while maintaining a complete audit trail.

Key Functionalities

1. Customer Order Management

- Place Regular, Scheduled, or Pre-Orders
- Modify order before Seller acceptance
- Add or remove products
- Update product quantity
- Cancel full or partial order

- Raise reschedule request after Seller acceptance
- Approve or reject replacement products
- Track order status and notifications

---

2. Seller Order Management

- Review product availability
- Accept or reject orders
- Partially cancel unavailable products
- Replace unavailable products with alternatives
- Split order into multiple deliveries
- Modify customer cart before processing
- Generate revised bill
- Reschedule delivery date
- Communicate with customer

---

3. Assistant Operations

- Perform operational activities based on assigned permissions
- Modify orders
- Partial cancellation
- Product replacement
- Reschedule deliveries
- Update order status
- Contact customers
- No access to financial settlement or refunds

---

4. Platform / Super Admin

- Override seller decisions
- Approve reschedule requests
- Process wallet refunds
- Modify financial settlements
- Resolve customer disputes
- Manage delivery charges
- View complete audit logs
- Force cancel or modify orders when required

---

5. Partial Order Processing Options

- Partial Item Cancellation
- Product Replacement
- Split Delivery
- Full Order Cancellation
- Revised Invoice Generation
- Customer Approval Workflow

6. Price Adjustment Management

- Additional payment collection
- Wallet refund
- Wallet credit
- Credit note generation
- Settlement recalculation
- Automatic commission adjustment

---

7. Delivery Management

- Deliver available items immediately
- Schedule remaining items for future delivery
- Calculate additional delivery charges
- Support Seller Logistics or Platform Logistics
- Notify customer for every delivery update

---

8. Financial Settlement

- Automatic refund calculation
- Seller settlement adjustment
- Platform commission recalculation
- Wallet transaction management
- Invoice revision
- Complete transaction history

---

9. Order Status Lifecycle

- Order Placed
- Seller Review
- Accepted / Rejected
- Partial Updated
- Customer Confirmation
- Preparing
- Packed
- Out for Delivery
- Delivered
- Completed
- Refunded (if applicable)

---

10. Business Rules

- Customers can modify the order before Seller acceptance.
- After Seller acceptance, only request-based modifications are allowed.
- Replacement products require customer approval.

- Partial cancellations generate automatic wallet refunds.
- Split deliveries create separate delivery records.
- Every modification is logged with version history.
- Inventory and settlement are updated automatically.
- Super Admin has override authority for all order transactions.
