Zinto — Multi-Vendor Hyperlocal Commerce Platform | Requirements Traceability & Test Checklist

S.No	Requirement	Status	Remarks / Notes
1.1 Product Vision			
1	Support multi-vendor operations	Done	
2	Support multi-city operations	Done	
3	Support hyperlocal commerce workflows	Done	
4	Support large-scale product inventory (lakhs of products)	Done	
5	Support high traffic and scalable architecture	Done	
6	Support category/subcategory-driven catalog management	Done	
7	Support seller subscriptions and commission-based business models	Done	
8	Support advanced order lifecycle management	Done	
9	Support dynamic pricing and charge components	Done	
10	Support search, recommendations, and store discovery	Done	
11	Support scheduled/future order workflows	Done	
12	Support refunds, returns, partial cancellations, and replacements	Done	
13	Support admin-driven configurability across platform operations	Done	
2.1 Database / Schema / System Design Expectations			
14	Database architecture accommodates present and future functionalities	Done	
15	Support multi-vendor platform architecture	Done	
16	Support multi-city operations	Done	
17	Support lakhs of products in inventory	Done	
18	Support categories and subcategories	Done	
19	Support packaging categories	Done	
20	Support transferable / transaction-based category structures if needed	Done	
21	Support orders / payments / cancellations / refunds / returns / partial cancellation / replacement / complaint workflows	Done	
22	Support coupon / offer / subscription / discount modules	Done	
23	Support future feature additions	Done	
24	Support high traffic load	Done	
25	Support scalable search and discovery	Done	only on user side
26	Support scalable order management and operational workflows	Done	
2.2 Technical Expectations			
27	Loose coupling between modules	Done	
28	Scalable component structure	Done	
29	API-ready models and backend architecture	Done	
30	Secure authentication	Done	
31	Efficient search and API handling	Done	
32	Future extensibility without schema redesign	Done	
33	Support role-based flows across Admin / Seller / Customer / Logistics	Done	
3.1 Multi-Vendor Model			
34	Multiple sellers/stores can onboard and sell products	Done	
3.2 Multi-City Model			
35	Support multi-city operations with city-wise configurable business rules (commissions, delivery, seller/store operations)	Done	
3.3 Hyperlocal Commerce Model			
36	Support hyperlocal/quick commerce with nearby seller/store discovery and short delivery workflows	Done	
4.1 Customer Panel / Customer App			
37	Register / login	Done	
38	Browse products and stores	Done	
39	Search products and sellers	Done	
40	Add products to cart	Done	
41	Place orders	Done	
42	Place scheduled/future orders	Done	
43	Track order status in real time	Done	
44	Cancel order under allowed conditions	Done	
45	Raise cancellation request	Done	
46	Request refund / complaint within allowed period	Done	
47	Accept/reject replacement suggestions	Done	
48	Reorder previous orders	Done	
49	Rate/feedback on delivered order	Done	
50	Add seller/store to favourites	Done	
51	View previous orders	Done	
4.2 Seller Panel			
52	Login to seller portal	Done	
53	Manage shop/store profile	Done	
54	Add and manage products	Done	
55	Manage product listing	Done	
56	Set product pricing	Done	
57	Manage stock/inventory	Done	
58	Publish future-order / pre-book products	Done	
59	View and process incoming orders	Done	
60	Accept orders	Done	
61	Pack orders	Done	
62	Suggest replacement products	Done	
63	Shift delivery to next day where applicable	Done	
64	Cancel orders with reason	Done	
65	Upload / capture delivery-time proof photo	Done	
66	Manage future-order configuration for selected products	Done	
67	View settlement-related data if settlement module is enabled	Done	
68	Operate with platform logistics or self-delivery mode based on admin/business rules	Done	
4.3 Admin / Super Admin Panel			
69	Create seller/vendor accounts	Done	
70	Send seller credentials and app links via email	Done	
71	Manage seller onboarding	Done	
72	Manage subscription plans	Done	
73	Manage commission configuration	Done	dont have separated commission configuration page --> commission is applied on city , category pages
74	Manage orders and complete order lifecycle	Done	flow is there but not updating on ui
75	Monitor all orders in super admin panel	Done	
76	Approve cancellation requests	Done	
77	Assign logistics after packing	Done	
78	Manage homepage configuration	Done	
79	Manage banners, categories, featured products, offers, seller highlights	Done	SELLER HIGHLIGHTS?
80	Manage seller recommendations for offline sellers	Done	
81	Configure refunds category-wise	Done	
82	Configure odd-hour charges, weather fees, delivery charges, platform charges etc.	Done	
83	Manage advertisements / Super AD placements	Done	
84	Configure dynamic sections and platform rules	Done	
85	Add/edit seller products on behalf of seller	Done	
86	Manage seller shop setup on behalf of seller	Done	
87	View and manage seller settlement and bulk-order settlement, if applicable	Not Done	
5. Seller Onboarding & Vendor Management			
88	Admin can create vendor/seller accounts	Done	
89	Vendor login credentials shared through email	Done	
90	Seller application link shared through email	Done	web link
91	Admin can manage vendor accounts and seller onboarding process centrally	Done	
6. Seller Subscription Model & Seller Limitation			
92	Seller can onboard/register up to 30 products under base subscription model	Done	
93	Seller must choose a monthly subscription plan to add more than 30 products	Done	
94	Higher commission levels applied if seller does not choose subscription after allowed product limit	Done	
95	Seller business model configurable as subscription basis or commission basis	Done	
7. Commission Management System			
96	Dynamic and configurable commission structure	Done	
97	Support city-wise commission	Done	
98	Support shop-wise commission	Done	
99	Support category-wise commission	Done	
100	Support sub-category-wise commission	Done	
101	Support product-wise commission	Done	
102	Support sub-product-wise commission	Done	
103	Support add-on product-wise commission	Done	
104	Support shop-level commission	Done	
105	Support additional commission components: user, shop, category, platform commission	Done	
106	Seller inputs base price per product	Done	
107	Platform applies commission, GST, packing charges on top of base price	Done	
108	Cart/order-level additional charges: handling fees, platform fees, weather surcharge, odd hours surcharge, delivery charge, platform charges	Done	
109	Commission and its application/control handled by admin/platform, not seller	Done	
8. Pricing, Charges, Fee Components & Invoice System			
110	Invoice includes breakup of: product cost, handling fees, GST, delivery fees, bad weather fees, odd hours charges, packaging charges, platform-related charges	Done	
111	Support product-level/category-level charges: commission, GST, packaging charges	Done	gst left
112	Support cart/order-level charges: handling fees, platform fees, delivery charge, weather surcharge, odd hours surcharge, platform charges	Done	
113	Auto-generated GST invoices available for customers	Done	
114	Auto-generated GST invoices available for sellers	Done	
115	Packaging, handling, delivery, weather-based, odd-hour charges configurable from admin panel	Done	
9. Order Timing Rules & Order Placement Restrictions			
116	No order placement allowed after 10 PM	Done	
117	Odd-hour delivery support and odd-hour charges configurable from admin panel	Done	
10. Packaging Charges & Packaging Logic			
118	Packaging charges vary based on product category, handling requirement, packaging complexity	Done	
119	Schema supports packaging categories / packaging charge logic	Done	
11. Product Catalog, Product Rules & Inventory Management			
120	Seller can manage product details, images, description, pricing, stock/inventory, category/store association	removed	
121	Product description details managed by seller	removed	
122	Out-of-stock products not displayed in customer application	Done	
123	System supports time-based category/product availability rules	Done	
12.1 Super Admin Visibility of Seller Product Listings			
124	Super Admin can view all products lated by each seller	Done	
125	Visibility includes seller-wise product listings, product details, status/pricing/category/stock, seller-shop-wise product mapping	Done	
12.2 Product Entry by Super Admin on Behalf of Seller			
126	Admin can select a seller/store and add products under that seller's shop	Done	
127	Admin can enter product details, pricing, category, stock, description, images, listing data	Done	
128	Admin can publish/manage the product listing for that seller	Done	

Zinto — Multi-Vendor Hyperlocal Commerce Platform | Requirements Traceability & Test Checklist

S.No	Requirement	Status	Remarks / Notes
12.3 Product Editing by Super Admin			
129	Admin can edit product name/details	Done	
130	Admin can edit product description	Done	
131	Admin can edit product category/subcategory	Done	
132	Admin can edit product pricing	Done	
133	Admin can edit stock/inventory details	Done	
134	Admin can edit product images	Done	
135	Admin can edit product visibility / listing status	Done	
136	Admin can edit future-order related configuration if applicable	Done	
137	Admin can edit add-on / mapping / packaging-related product configuration if applicable	Done	
12.4 Full Shop Setup / Shop Management on Behalf of Seller			
138	Admin can configure/manage shop/store profile details	Done	
139	Admin can configure shop banners / shop media / about shop details	Done	
140	Admin can configure shop category mapping	Done	
141	Admin can configure product listing under the shop	Done	
142	Admin can configure commission configuration / business configuration where applicable	Done	
143	Admin can perform seller operational setup needed to make the shop live on platform	Done	
12.5 Admin Override / Assisted Seller Management Use Case			
144	System supports admin-assisted seller management model (seller self-manage or admin manages on behalf)	Done	
13. Category & Catalog Structure			
145	Support categories	Done	
146	Support subcategories	Done	
147	Support product categorization	Done	
148	Support shop category navigation	Done	?
149	Support packaging-related category structures if needed	Done	
150	Category model supports name, image, subcategories, slug	Done	
14.1 Search Types Supported			
151	Product search: text/keyword search	Done	
152	Product search: real-time suggestions	Done	
153	Product search: search history	Done	
154	Product search: trending searches	Not Done	
155	Voice search: microphone-based search	Done	
156	Voice search: speech-to-text support	Done	
157	Voice search: interactive listening UI	Done	
158	Seller/store search: direct seller search	Done	
159	Seller/store search: search stores directly	Done	
160	Seller/store search: seller-wise product search	Done	? - need clarification
161	Category search: search by category	Done	
162	Category search: grid-based category browsing UI	Done	
163	Category search: sub-category navigation	Done	
14.2 Smart Search & Recommendation Layer			
164	Support smart recommendations	Done	
165	Support auto suggestions	Done	
166	Support intelligent product discovery	Done	
14.3 Search Results Behaviour			
167	Architecture supports showing search & discovery results, store results, product/category result combinations simultaneously	Done	?
15. Map-Based Search & Discovery			
168	Support searching stores via map	Done	
169	Support map-based banner / discovery use cases in home/store visibility design	Partial / in progress	?
16. Recommendation, Add-On & Cross-Sell Module			
170	Support intelligent add-on/cross-sell product suggestions (e.g., Umbrella + Torch, Dosa + Chutney)	Done	
171	Add-on products supported as a commerce object within pricing/commission/product logic	Done	
17.1 Store / Shop Section in Customer App			
172	Premium store cards	Done	
173	Store logo	Done	
174	Store banners	Done	not on card
175	Ratings display	Done	
176	Delivery estimates display	Done	
177	Modern animations / gradients	Done	
17.2 Shop Module Details			
178	Video banner on shop page	Done	
179	Shop + YouTube banner display	Done	advertisement yes , banner no
180	Signature products section	Done	
181	"About My Shop" section	Done	
17.3 Store Model Requirements			
182	Store model supports store details, ratings, operating hours, delivery radius	Done	
183	Consider delivery target expectations of 12-15 minutes (not confirmed as final SLA)	Done	?
18. Seller Logistics Flexibility / Logistics Participation Model			
184	Seller not mandatorily bound to use platform logistics	Done	
185	Support platform-assigned logistics mode	Done	
186	Support seller self-delivery / self-managed logistics mode	Done	
187	Support hybrid / configurable logistics model if required	Done	
188	Admin can configure whether seller uses platform logistics, self-delivery, or both	Done	
189	Where platform logistics applicable, admin can assign logistics after seller packing	Done	
190	Where seller self-delivery mode, order flow supports seller-managed fulfillment	Done	
19. Advertisement & Promotional Visibility Module			
191	Support banners for homepage	Done	
192	Support banners for promotional sections	Done	
193	Support banners for store/shop visibility	Done	
194	Support redirect-based banners if needed	Done	
195	Support Super AD / premium advertisement placement module	Done	
20. Terms & Conditions / Consent Requirements			
196	Mandatory T&C acceptance during registration/onboarding	Done	
197	Mandatory T&C acceptance during checkout	Done	
198	"Accept & Agree" checkbox mandatory wherever T&C acceptance required	Done	
21.1 Login / Signup Page			
199	Modern authentication UI	Done	
200	OTP verification	Done	
201	Email login	Done	
202	Mobile login	Done	
203	Responsive mobile-first design	Done	
21.2 Home Page			
204	Search bar	Done	
205	Delivery location	Done	
206	Promotional banners	Done	
207	Trending products	Done	
208	Recommended stores	Done	
209	Offers / recommended offers	Done	
21.3 Search Features			
210	Text search	Done	
211	Voice search	Done	
212	Search by store	Done	
213	Search by category	Done	
21.4 Attractive Store Section			
214	Store section with premium UI, strong discoverability, and engaging design	Done	
21.5 Client UI Expectations			
215	Premium UI quality	Done	
216	Search fast and intuitive	Done	
217	Store browsing highly attractive	Done	
22. Home Page Configuration & CMS-Style Admin Control			
218	Home page sections dynamic and configurable from admin panel	Done	
219	Admin can manage banners	Done	
220	Admin can manage categories	Done	
221	Admin can manage product sections	Done	
222	Admin can manage featured products	Done	
223	Admin can manage offers	Done	
224	Admin can manage seller highlights	Done	
23.2 Backend Model - Customer Model			
225	Customer model supports full name, email, mobile number, address, location, wishlist, order history	Done	
23.2 Backend Model - Cart Model			
226	Cart model supports product references, quantity, pricing, store references	Done	
23.2 Backend Model - Product Model			
227	Product model supports product details, images, pricing, stock management, category reference, store reference	Done	
23.2 Backend Model - Order Model			
228	Order model supports customer reference, product references, delivery details, payment status	Done	
23.2 Backend Model - Category Model			
229	Category model supports category name, image, subcategories, slug	Done	
23.2 Backend Model - Banners Model			
230	Banners model supports banner images, redirect links, active status, priorities	Done	inside heroconfigs
23.2 Backend Model - Store Model			
231	Store model supports store details, ratings, operating hours, delivery radius	Done	
23.2 Backend Model - Offer Model			
232	Offer model supports discount details, coupon codes, expiry, usage limits	Done	
23.2 Backend Model - Transaction Model			
233	Transaction model supports payment method, transaction ID, refund status, payment status	Done	
23.3 Additional Practical Models Implied			
234	Plan for Seller/Vendor model	Done	
235	Plan for Subscription model	Done	
236	Plan for Commission model	Done	not centralized
237	Plan for Refund model	Done	
238	Plan for Complaint model	Not Done	
239	Plan for Wallet model	Done	
240	Plan for Notification model	Done	
241	Plan for Logistics model	Done	
242	Plan for Seller availability model	Done	
243	Plan for Add-on product mapping model	Done	

Zinto — Multi-Vendor Hyperlocal Commerce Platform | Requirements Traceability & Test Checklist

S.No	Requirement	Status	Remarks / Notes
244	Plan for Advertisement / Super AD model	Done	
245	Plan for Future Order / Scheduled Product configuration model	Done	
246	Plan for Seller settlement model / payout ledger	Done	
247	Plan for Bulk-order settlement tracking model	Done	
248	Plan for Admin-assisted shop/product management support structure (mapping/audit) if required	Done	?
24. Order Management – Complete Lifecycle			
249	User gets clear and real-time order status visibility	Done	
250	Order status flow: Order Placed	Done	
251	Order status flow: Order Received	Done	
252	Order status flow: Order Accepted	Done	
253	Order status flow: Order Packed	Done	
254	Order status flow: Logistics Assigned	Done	
255	Order status flow: Out for Delivery	Done	
256	Order status flow: Delivered	Done	
257	Order status flow: Cancelled	Done	
258	Order status flow: Refund Initiated (if applicable)	Done	
259	All status updates visible to user	Done	
260	Users can track orders in real time	Done	
25.1 Order Management - Admin Responsibilities			
261	All orders reflected in Super Admin panel	Done	
262	Admin monitors and manages complete order lifecycle	Done	
263	Admin can update and manage orders	Done	
264	Admin assigns logistics after seller completes packing where platform logistics applicable	Done	
25.2 Order Management - Seller Responsibilities			
265	Seller views incoming orders	Done	
266	Seller accepts and processes orders	Done	
267	Seller packs orders	Done	
268	Seller may suggest replacement products	Done	?
269	Seller may shift order to next day where applicable	Done	
270	Seller uploads/captures delivery-time photo as proof during delivery	Not Done	
271	Seller can cancel order with valid reason	Not Done	
272	Seller fulfills through platform logistics or self-delivery based on configured mode	Done	
26.1 Scheduled Orders			
273	Users can place scheduled orders for a future date and time	Done	
26.2 Seller Future Order Panel			
274	Seller has dedicated Future Order / Pre-Booking panel to publish future-date products	Done	
26.3 Future Product Configuration by Seller			
275	Seller can mark product as Future Order / Pre-Book Product	Done	
276	Seller can configure future delivery date	Done	
277	Seller can configure future delivery window	Done	
278	Seller can configure booking availability period	Done	
279	Seller can configure applicable delivery duration / scheduling range	Done	
26.4 Advance Booking Window			
280	Customer can book future-order products in advance up to 1 month only	Done	ONE WEEK
26.5 Cart Validation for Future Products			
281	System checks if any cart item has a future sale/delivery date when future-order product added	Not Done	?
26.6 Mixed Cart Scheduling Rule			
282	If at least one future-order product exists in cart; entire order treated as scheduled delivery order	Not Done	
283	All products in cart/order delivered on future scheduled date/window applicable to that future-order product	Done	
26.7 Cart Page as Scheduling Page			
284	Cart page behaves as Scheduling Page when future-order product exists in cart	Done	
285	System shows only valid available future delivery dates for that product/order	Done	
286	Customer allowed to select only seller-configured dates for that future-order product	Done	
27.1 User Direct Cancellation Rule			
287	User can cancel order before seller accepts it	Done	
27.2 Post-Acceptance Cancellation Rule			
288	User cannot directly cancel order after seller acceptance	Done	
27.3 Cancellation Request Flow			
289	User can raise cancellation request before logistics assignment	Done	
290	Only Admin can approve and cancel order after reviewing request	Done	
27.4 Seller/Admin Cancellation			
291	Seller and Admin can cancel orders	Partial / in progress	
292	Seller must provide valid cancellation reason	Partial / in progress	multiple item done , single item not done
28.1 Shift Order to Next Day			
293	Seller can move/shift delivery date to next day if product available but cannot be delivered today	Done	
28.2 Partial Cancellation			
294	Unavailable products can be cancelled while remaining products continue processing/delivery	Done	
28.3 Product Replacement Suggestion			
295	Seller can suggest another available product if product unavailable	Done	
296	Replacement ideally same price as original	Done	
297	User can accept or reject replacement	Done	
28.4 Partial Fulfillment / Split Availability Handling			
298	Cancel unavailable items and refund the amount	Partial / in progress	
299	Deliver available items	Done	
300	Provide updated delivery timeline for unavailable items	Not Done	
301	Offer replacement product with customer confirmation	Done	
28.5 Delivery Extension			
302	Vendor/Seller can extend delivery date if order cannot be fulfilled on planned date	Done	
29.1 Refund Access Window			
303	Refund and complaint options available only within 24 hours after delivery	Done	
29.2 Refund Countdown			
304	User sees countdown timer for refund/complaint availability	Done	
29.3 Category-Based Refund Control			
305	Admin can enable/disable refunds based on product categories	Done	
29.4 Wallet Refund for Cancelled Items			
306	Amount refunded to customer wallet for cancelled/unavailable items	Done	
29.5 Refund Types to Support			
307	Support full refund	Done	
308	Support partial refund	Not Done	
309	Support cancellation refund	Not Done	
310	Support wallet refund where applicable	Done	
29.6 Complaint Management			
311	Complaint option available within same post-delivery allowed window	Done	
30.1 Seller Settlement Management			
312	Support Seller Settlement module for payout/settlement of seller earnings	Partial / in progress	
30.2 Settlement Scope			
313	Settlement considers product selling amount	Done	
314	Settlement considers applicable commissions	Done	
315	Settlement considers GST/tax components where relevant	Done	
316	Settlement considers packaging/handling charges sharing rules if applicable	Done	
317	Settlement considers refund deductions	Done	
318	Settlement considers partial cancellation adjustments	Done	
319	Settlement considers replacement impact, if any	Done	
320	Settlement considers platform charges or deductions, if applicable	Done	
30.3 Settlement Status Tracking			
321	Track settlement status: Pending settlement	Done	flow is there but not the tracking
322	Track settlement status: Processing settlement	Not Done	
323	Track settlement status: Settled	Not Done	
324	Track settlement status: On hold	Done	
325	Track settlement status: Adjusted/deducted due to refund or cancellation	Not Done	
30.4 Settlement Rules			
326	Settlement logic configurable: after order delivery	Not Done	
327	Settlement logic configurable: after return/refund window completion	Not Done	
328	Settlement logic configurable: after deduction of platform commission and applicable charges	Not Done	
329	Settlement logic configurable: hold in case of complaint/refund/cancellation dispute	Not Done	
30.5 Seller Settlement Visibility			
330	Seller panel shows total payable amount	Done	
331	Seller panel shows order-wise settlement amount	Done	
332	Seller panel shows commission deductions	Done	
333	Seller panel shows settlement history	Not Done	
334	Seller panel shows settlement status	Done	
30.6 Bulk Order Seller Settlement			
335	Support separate settlement calculation for bulk orders if business rules differ	Not Done	
336	Support bulk order commission / margin rules	Done	
337	Support partial fulfillment or partial cancellation impact on seller payout	Not Done	
338	Support settlement adjustment if bulk order delivery happens in multiple stages	Not Done	
339	Admin visibility of bulk order settlement breakdown	Not Done	
30.7 Admin Settlement Controls			
340	Admin can view seller settlement summaries	Done	
341	Admin can view order-wise seller payable amount	Done	
342	Admin can apply settlement deductions/adjustments	Done	
343	Admin can hold/release settlement	Done	
344	Admin can manage bulk-order settlement cases if applicable	Not Done	
31.1 Offline Seller Scenario			
345	User gets suggestions for alternative sellers if seller status offline	Not Done	
31.2 Admin Role (Seller Availability)			
346	Admin can manage seller recommendations / alternate seller suggestions	Done	
32. Notification System			
347	Notify: Order placed successfully	Done	
348	Notify: Seller accepted the order	Done	
349	Notify: Order packed	Done	
350	Notify: Logistics partner assigned	Done	
351	Notify: Order out for delivery	Done	
352	Notify: Order delivered	Done	
353	Notify: Cancellation updates	Done	

Zinto — Multi-Vendor Hyperlocal Commerce Platform | Requirements Traceability & Test Checklist

S.No	Requirement	Status	Remarks / Notes
354	Notify: Refund updates	Done	
33.1 Feedback & Rating			
355	Customer can provide order feedback	Done	
356	Customer can provide rating / review	Done	
33.2 Reorder			
357	Customer can reorder previously placed orders	Done	
33.3 Favourite Seller			
358	Customer can add seller/store to favourites	Done	not showing in favourites page
33.4 Previous Orders			
359	Customer can view previous orders / order history	Done	
34.1 Frontend Deliverables Discussed			
360	Authentication screens	Done	
361	Home page UI	Done	
362	Search modules	Done	
363	Store discovery pages / attractive store section	Done	
34.2 Backend Deliverables Discussed			
364	Database schemas	Done	
365	API-ready models	Done	
366	Relationship definitions	Done	
34.3 Action Items Discussed Across MOMs			
367	Finalize scheduled order workflow	Done	
368	Implement stock visibility logic	Done	?
369	Define refund, cancellation, and replacement process	Done	
370	Implement order tracking functionality	Done	
371	Set up vendor onboarding via email	Done	
372	Develop admin order management features	Done	
373	Develop home page UI	Done	
374	Implement search features	Done	
375	Design attractive store section	Done	
376	Create database schemas for discussed models	Done	
377	Define model relationships	Done	
378	Prepare for UI review / schema review / feature prioritization discussions	Done	
35. Final Product Owner Summary			
379	Seller onboarding and flexible seller business models	Done	
380	Dynamic commission and pricing logic	Done	
381	Category/store/product-level configurability	Done	
382	Premium customer-facing UI	Done	
383	Search-heavy product/store discovery	Done	
384	Smart recommendations and add-on selling	Done	
385	Configurable homepage and advertising support	Done	
386	Full order lifecycle visibility	Done	
387	Flexible cancellation / refund / replacement workflows	Done	
388	Real-time notifications and post-order engagement	Partial / in progress	
389	Scheduled orders and seller-driven future/pre-book product publishing	Done	
390	Flexible logistics participation model for sellers	Done	
391	Seller settlement and payout handling	Done	
392	Admin-assisted product listing and seller shop setup	Done	
393	Scalable architecture for multi-city, high-traffic operations	Partial / in progress	
394	Clear role-based separation across Customer, Seller, Admin, and operational modules with configurable, future-ready business rules	Done	
36	**Additional requirements**		
365	Allow sellers to easily activate or deactivate (turn ON/OFF) their products at any time when they do not want to sell them.	Done	
366	Allow sellers to schedule product availability/unavailability on a daily basis or for a specified sales duration (e.g., 2 hours), so the product is automatically hidden from the seller shop during the specified time period.	Done	
367	Allow customers to add additional items to an existing order while the order has not yet been packed by the seller.	Done
