Dynamic Logistics Control & Delivery Management

1. Customer Scope

The Customer module provides flexibility in choosing how orders are received while ensuring a seamless shopping experience.

Scope

- Browse nearby shops based on location.
- View available delivery methods for each shop.
- Choose preferred fulfillment option:
  - Customer Pickup
  - Seller Delivery
  - Platform Logistics
- View delivery charges and estimated delivery time.
- Select available delivery slots.
- Place Regular Orders.
- Place Scheduled Orders.
- Place Pre-Orders.
- Track order status.
- Receive order notifications.
- Collect Pickup Orders using Order Number, OTP, or QR Code.
- Raise cancellation or reschedule requests as per business rules.

2. Seller (Shop Admin) Scope

The Seller module enables complete operational control over shop fulfillment, delivery policies, and order processing.

Scope

- Configure shop delivery policies.
- Enable/Disable Customer Pickup.
- Enable/Disable Seller Self Delivery.
- Enable/Disable Platform Logistics.
- Enable Automatic Platform Logistics when unavailable.
- Configure delivery radius.
- Configure delivery slots.
- Configure same-day delivery cut-off time.
- Configure shop working days and business hours.
- Enable Vacation Mode or Temporary Shop Closure.
- Accept or reject customer orders.
- Process Regular, Scheduled, and Pre-Orders.

- Manage delivery assignments.
- Monitor delivery status.
- Manage multiple shops independently.

3. Super Admin (Platform Owner) Scope

The Super Admin module provides centralized governance and operational control over the logistics ecosystem.

Scope

- Configure platform-wide logistics policies.
- Manage logistics partners.
- Override seller delivery configurations.
- Enable or disable Platform Logistics.
- Configure delivery service areas.
- Configure delivery charges.
- Assign or reassign logistics partners.
- Monitor logistics operations.
- Manage delivery SLA and performance.
- Resolve delivery disputes and escalations.
- Generate operational and logistics reports.
- Manage emergency logistics operations.

4. Assistant Scope

The Assistant supports daily shop operations based on permissions granted by the Seller.

Scope

- View assigned shop orders.
- Accept or reject orders.
- Update order status.
- Manage scheduled deliveries.
- Coordinate with customers.
- Assist in order preparation.
- Assist in dispatch activities.
- Perform operations only within assigned permissions.

5. Delivery Partner Scope

The Delivery Partner is responsible for collecting and delivering customer orders.

Scope

- Receive assigned delivery requests.
- Navigate to seller location.
- Collect order from the seller.
- Deliver order to customer.
- Verify delivery using OTP or QR Code.
- Update delivery status.
- Report delivery exceptions.
- Complete delivery confirmation.

6. Delivery Fulfillment Models

The platform shall support multiple fulfillment methods for every shop.

Supported Models

- Customer Pickup
- Seller Self Delivery
- Platform Managed Logistics

Each shop may enable one or multiple fulfillment methods simultaneously.

7. Shop Delivery Policy

Each shop shall independently configure its delivery preferences.

Configurable Policies

- Customer Pickup (ON/OFF)
- Seller Self Delivery (ON/OFF)
- Platform Logistics (ON/OFF)
- Automatic Switch to Platform Logistics
- Delivery Radius
- Delivery Time Slots
- Same-Day Delivery
- Scheduled Delivery
- Delivery Cut-Off Time

8. Dynamic Delivery Control

The platform shall allow sellers to temporarily modify delivery operations without changing permanent shop settings.

Supported Controls

- Vacation Mode
- Temporary Shop Closure
- Festival Mode
- Emergency Closure
- Staff Unavailability
- Temporary Platform Logistics Activation
- Automatic Restoration of Previous Settings

9. Shop Availability Management

Each shop shall manage its operational availability independently.

Configuration

- Working Days
- Working Hours
- Weekly Off
- Public Holidays
- Vacation Period
- Emergency Closure
- Business Pause
- Automatic Reopening

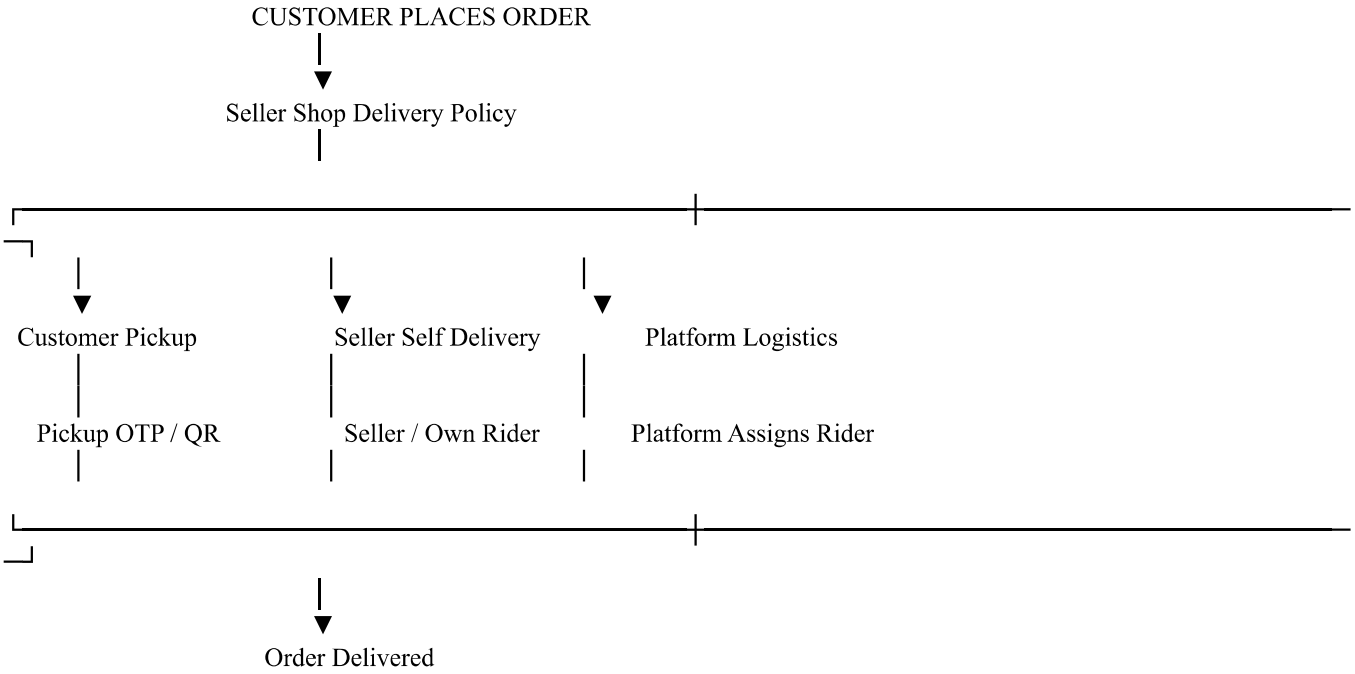

10. Customer Experience

The platform shall provide a consistent and transparent delivery experience.

Features

- Multiple delivery options
- Real-time delivery availability
- Estimated delivery time
- Delivery slot selection
- Delivery charge visibility
- Order tracking
- Pickup verification (OTP/QR Code)
- Delivery notifications
- Seamless order fulfillment
- Consistent shopping experience across all shops
