Order Life Cycle managemenr.png;

1. Purpose

- Business Objective
- Scope
- Supported Order Types

2. Order Types

- Regular Order
- Scheduled Order
- Pre-Order
- Mixed Cart Order

3. Customer Functionalities

Each feature should include:

- Description
- Preconditions
- Workflow
- Business Rules
- Validation Rules
- UI Behaviour
- Notifications
- Exception Handling

Examples include:

- Place Regular Order
- Place Scheduled Order
- Place Pre-Order
- Reschedule Before Seller Acceptance
- Request Reschedule After Seller Acceptance
- Cancel Order
- Partial Cancel
- Mixed Cart Handling
- Wallet & Refund Rules

4. Seller/Admin Functionalities

Separate sections for:

- Create Pre-Order Campaign
- Define Sale Window
- Define Delivery Window
- Set Cut-off / Threshold Days
- Move Order to Future Date
- Accept / Reject Orders
- Price Revision
- Inventory Reservation
- Customer Notification

5. Assistant Functionalities

Clearly define:
Allowed:

- Accept Order
- Reject Order
- Reschedule
- Modify Quantity
- Partial Cancel
- Contact Customer
- Prepare Dispatch

Restricted:

- Settlement
- Subscription
- Finance
- Pricing Rules
- Commission Settings

6. Super Admin Functionalities

Platform override capabilities:

- Reschedule on behalf of Customer
- Reschedule on behalf of Seller
- Force Cancel
- Manual Settlement
- Wallet Adjustment
- Delivery Override
- Logistics Assignment
- Resolve Conflicts
- Refund Approval

7. Business Rules

Examples:

- Seller defines cut-off period (1, 2, 3, 4… days)
- Customer can modify until cut-off
- After seller acceptance, customer raises a reschedule request
- Existing orders retain the original price unless revised
- Price changes generate wallet credit/debit or revised payment request
- Inventory reserved after seller acceptance

8. Scenario Matrix

Cover all client scenarios plus additional edge cases.
Existing scenarios:

- Mixed Regular + Pre-Order
- Single Pre-Order
- Seller changes delivery date
- Price increase/decrease

Additional recommended scenarios:

- Multiple pre-order campaigns
- Seller out of stock before scheduled delivery
- Customer changes delivery address
- Holiday closures
- Delivery partner unavailable
- Seller subscription expires before scheduled date
- Customer wallet insufficient for revised bill
- Auto-cancel after payment timeout
- Inventory conflict across shops
- Shop closed on scheduled delivery
- Logistics reassignment
- Customer no-show

9. Notifications

Role-wise notification matrix:
Customer

- Order Confirmed
- Order Scheduled
- Delivery Reminder
- Price Changed
- Wallet Credited
- Wallet Debited
- Seller Accepted
- Reschedule Approved
- Order Cancelled
- Dispatch Started

Seller

- New Scheduled Order
- Upcoming Preparation
- Cut-off Reminder
- Customer Reschedule
- Payment Pending
- Revised Bill Paid

Assistant

- Assigned Order
- New Task
- Schedule Changed

Super Admin

- Pending Approval
- Escalation
- Refund Required
- Delivery Failure

10. State Machine

A complete order lifecycle with status transitions such as:
Draft → Payment Pending → Confirmed → Scheduled → Accepted → Preparing → Packed → Out for Delivery → Delivered
Additional states:

- Pre-Order Active
- Awaiting Sale Window
- Reschedule Requested
- Rescheduled
- Partial Cancelled
- Price Revised
- Awaiting Additional Payment
- Wallet Adjustment
- Delivery Failed
- Returned
- Refunded
- Completed

11. UI Behaviour
Define page behavior for:
Customer

- Calendar Picker
- Delivery Date Selector
- Pre-Order Banner
- Countdown Timer
- Available Delivery Dates
- Wallet Summary

Seller

- Campaign Builder
- Threshold Settings
- Order Calendar
- Production Planner
- Delivery Calendar

Assistant

- Today's Schedule
- Upcoming Deliveries
- Reschedule Requests

Super Admin

- Global Calendar
- Escalation Queue
- Manual Override Panel

12. API & Validation Requirements
Include developer-focused rules:

- Delivery date validation
- Sale window validation
- Cut-off enforcement
- Inventory reservation
- Price synchronization
- Wallet reconciliation
- Logistics assignment
- Settlement calculations
